Comments:

The Burdekin mills crushed just under 340,000 tonnes for the week.

Throughput was down mainly due to harvesting disruptions caused by a weather event on Thursday morning that delivered up to 15mm of rain across the region. Kalamia Mill also required an extended stop late in the week to do shredder repairs.

About 4.82M tonnes, or just under 60% of the forecast 8.15M tonne Burdekin crop, has been crushed to date.

The average weekly CCS was 14.92, which was up on the previous week. While the CCS continues to trend upwards, it is still below the weekly budget.

The highest CCS sample of 17.9 was a rake of Q183 - P in the Barratta productivity area.

We have seen good rail safety compliance from the community so far this crushing season. Members of the public are urged to continue to use their train brains.
