Comments:

While the weather has cleared, ground conditions remain soft in some areas, making harvesting difficult.

Throughput was just under 340,000 tonnes this week which is slightly reduced due to a combination of wet ground conditions and some processing issues.

The total volume of cane processed for the season to date has now exceeded 2M tonnes.

Average weekly CCS was again below budget.

The highest CCS sample of 17.1 was from a rake of Q240-P in the Invicta Productivity Area.
