Comments:

Just under 370,000 tonnes of cane were processed this week.

Throughput was just on budget although there was no time lost for wet weather.

The season to date total for the Burdekin mills is now just over 4.0M tonnes, which represents just under 50 per cent of the total forecast crop.

CCS increased again this week with the dry conditions but is still very slightly below budget.

The highest CCS sample of 18.0 was from rakes of Q240-1R, Q240-2R and Q240-PL – all in the Invicta Productivity Area.

Ahead the upcoming school holidays, parents and carers are urged to talk to their children about the dangers of playing around the cane rail network. Please remind children to stay well away from rail lines, cane bins and rail bridges.
