Comments:

Just over 358,000 tonnes of cane were processed this week.

The season to date total for the Burdekin mills is now just under 4.8M tonnes which represents about 59 per cent of the total forecast crop.

CCS continues to climb with the dry conditions. The weekly average of 15.46 was above budget.

The highest CCS sample of 18.2 was from rakes of Q240-2R in the Mulgrave Productivity Area.

With the school holidays in full swing and the weather warming up, parents and carers are urged to continue talking to children about the dangers of playing around the rail network, in particular rail bridges.
