Comments:

Just over 340,000 tonnes were processed this week.

Throughput was down at Pioneer Mill as crews completed necessary repairs to an evaporator which was impacting rate.

The season-to-date total for the Burdekin mills is now just over 5.1M tonnes, which represents about 62% of the total forecast crop.

Pioneer, Kalamia and Inkerman mills have now processed more than 1M tonnes each. Invicta Mill has passed the 2M tonnes mark.

CCS continues to climb with the dry conditions and is tracking above budget. The high CCS, together with increasing temperatures, will soon start impacting rates.

The highest CCS sample of 18.3 was from rakes of Q183-2R in the Invicta Productivity Area.

It's pleasing that no incidents were reported around our rail network during the recent Queensland school holidays and long weekend.
