Comments:

The Burdekin mills processed just under 388,000 tonnes of cane for the week. This exceeded the budgeted throughput for the week although there were no stops for wet weather.

Weekly throughput at Inkerman was the highest for the season to date. Throughput at Pioneer was impacted by an extended cleaning intermission to do necessary repairs and a number of unplanned stops.

The season-to-date total is now 4.80M tonnes, which represents 59% of the Burdekin region's crop forecast of 8.20M tonnes.

The average weekly CCS was 14.71, which is still slightly below budget but improving with the ongoing dry conditions.

The highest CCS, of 17.9, was from a rake of Q240 1R in the Mulgrave (Invicta) productivity district.

Remember to always use your train brain and give way to trains at road crossings.
