Comments:

Throughput for the week was just over 283,000 tonnes, bringing the season total to just under 2.8M tonnes or 35% of the total crop.

The wet weather event from last week resulted in delayed and slow starts this week which impacted throughput.

Another rain event on Thursday night stopped production at all factories on Friday.

The Invicta cane supply area received the least amount of rain and the factory recovered well while the other three mills were stopped for all of Saturday, resuming production on Sunday.

CCS fell below budget this week as a result of the wet weather. The highest CCS recorded for the week was 17.2 from a rake of Q240 1R in the Jardine productivity district.

Parents and carers are asked to remind children to stay away from the cane railway network. Members of the public are urged to report any suspicious activity around our cane rail line to the police.
