Comments:

The Burdekin mills processed just shy of 400,000 tonnes for the week – the highest weekly throughput for the season to date.

It brings the season total to 3.58M tonnes, which is just ahead of the budgeted total of 3.56M tonnes.

Pioneer and Inkerman mills both recorded their highest weekly throughput for the season.

The only major stops for the week were an eight-hour stop at Kalamia to repair a turbine steam leak and a 12-hour cleaning intermission at Invicta.

CCS increased again from last week but was still just below budget. The highest CCS recorded for the week was 18.5 from a rake of Q240 plant in the Mulgrave productivity district.

Parents and carers are asked to remind children to stay away from the cane railway network. Members of the public are urged to report any suspicious activity around our cane rail line to the police.
