Comments:

Throughput for the week was just under 10,000 tonnes. This was the last cane harvested at Inkerman Mill and brings the 2025 Burdekin season to an end.

Total throughput for the 2025 season was 7.599M tonnes – well below the original forecast.

CCS finished the season at 14.42 which is better than the original budget.

Even though the crushing season is now over in the Burdekin, trains will continue to run as we store and secure bins. Track maintenance equipment has also started to move around the network.

Please continue to approach cane rail crossings with caution and take care around our cane rail network.
