Comments:

Crushing operations commenced at Invicta Mill on Wednesday 10 June and at Kalamia Mill on Friday 12 June. Total throughput of just under 65,000 tonnes was achieved for the week.

Invicta and Kalamia mills both started very well, however throughput was restricted due to reduced cane supply as a result of wet field conditions.

The highest CCS sample was 14.85 from a rake of KQ228 second ratoon recorded in the Invicta area.

Inkerman Mill is scheduled to start on Monday 15 June followed by Pioneer Mill on Tuesday 16 June.

Cane trains are now operating 24 hours a day, seven days a week, around our cane rail network. Please report any flashing light issues through the 1800 number displayed on the poles at our active level crossings.
