Q208	16	15.99	Q252	1	15.05
Q183	14	16.35			

Comments:

The Burdekin mills processed just over 330,000 tonnes for the week.

Inkerman Mill's throughput was restricted by the failure of the site's main 10MW generator, following an external network event early on Monday morning.

During the week, five portable generator units were installed at Inkerman Mill to supply power to the factory, some Inkerman cane was transferred to Invicta Mill for processing, and the site's 10MW generator was transported to Brisbane for repairs.

Average weekly CCS dropped slightly to 15.62, which is still above budget. Season to date CCS is now up to 14.48 units.

The highest CCS sample was 18.70 from a rake of Q183 third ration cane in the Invicta area.

The Burdekin mills have now processed more than six million tonnes for the season to date.

John Tait Cane Supply Manager Burdekin Region
