Comments:

Throughput for the Burdekin mills in week two of the season was just over 316,000 tonnes. This was above budget despite the impact of wet weather on cane supply.

Inkerman Mill experienced the greatest impact, with some areas receiving more than 60mm of rain for the week. The mill ran out of cane on Thursday morning and did not resume crushing operations until Sunday night.

The north bank mills experienced some cane supply shortfalls, but much lower rainfall totals meant harvesters were able to get back into paddocks sooner.

Average weekly CCS was 13.05. This was above budget and a good outcome given the wet conditions experienced across the region.

The highest CCS sample was 16.2 from a rake of Q240 Plant cane in the Invicta Mill area.

Wilmar employees delivered the cane train safety message for the first time at the new Queensland Country Bank Stadium on Friday night, with community engagement activities held before and during the Cowboys versus Sharks game. Engagement was good and feedback was positive.
