

KALAMIA MILL

2023 pre-season steam trials

2 May 2023

Steam trials

In readiness for the start of the 2023 crushing season, pre-season factory steam trials are scheduled at Kalamia Mill on:

Friday, 26 May and Thursday, 1 June 2023

Short bursts of steam noise will be produced during these trials.

We are legally required to perform safety trials on our factory steam plant prior to commencing regular crushing operations. Steam trials also enable us to commission the new items of plant installed during the 2023 maintenance season.

Efforts will be made to minimise noise during this time.

Crush start

Crushing is expected to start at Kalamia Mill on:

Thursday, 8 June 2023

Kind regards

Andrew Wallwork
Production Superintendent
Kalamia Mill
