

RENEWABLE ENERGY

It's what we do

While others talk about renewable energy, *we do it.*
We've been using bagasse to power our sugar mills
and our communities for years.

We're one of
**AUSTRALIA'S
LARGEST**
producers of renewable
energy from biomass

We generate electricity
from bagasse 24/7. It's
CLEAN ENERGY
and it's **RELIABLE**

We've been powering
Queensland homes on green
energy for
60 YEARS

OUR MILLS
have a total
generation capacity
of **202 MW**

We produce about
594,000 MWh
of renewable
electricity a year*

Each year, we export
334,000 MWh to the
grid - enough to power more
than **72,600 HOMES**
for a year*

Bagasse fuels 20% of Australia's renewable energy - more than solar, wind or hydro**

*Figures are annual average 2017-2021
