

# RENEWABLE ENERGY

*It's what we do*

While others talk about renewable energy, *we do it.*  
We've been using bagasse to power our sugar mills  
and our communities for years.

We're one of  
**AUSTRALIA'S  
LARGEST**  
producers of renewable  
energy from biomass

We generate electricity  
from bagasse 24/7, for nine  
months of the year. It's  
**CLEAN ENERGY**  
and it's **RELIABLE**

We've been powering  
Queensland homes  
on green energy for  
**60 YEARS**

**OUR MILLS**  
have a total  
generation capacity  
of **202 MW**

We produce about  
**573,000 MWh**  
of renewable  
electricity a year\*

Each year, we export  
**313,800 MWh** to  
the grid - enough to power  
about **60,000 HOMES**  
for a year\*

Bagasse fuels 19% of Australia's renewable energy \*\*
