USER GUIDE

Daily consumption

Typically 0.5-2 litres (good pastures) and up to 2-4 litres in poorer pasture conditions. Intake will also vary according to the condition and age of cattle.

Feeder

Open trough or licker wheel trough (reduces intake and wastage).

Compatibility

Use alone or as a carrier for additional nutrients (after consulting a nutritionist).

Shelf life

Use within six months of production is recommended.

Storage

Molasses or lick-grade poly tanks, stainless steel or fibreglass vessels are recommended. Ensure storage vessels have weather-proof, vermin-proof vapour vents. If storing for long periods, circulate the tank from the bottom to ensure adequate suspension of nutrients and prevent settling.

Safety

Avoid use of concrete, cement or mild steel containers due to the corrosive nature of this product. Never enter storage vessels or confined spaces containing OrganicFlo or SuplaFlo without adequate training and correct protective equipment.

WILMAR LIQUID STOCKFEED SUPPLEMENTS

Our natural-protein liquid supplements are based on 100% Australian fermented molasses and produced at Sarina.

They offer a simple and nutritious solution to support your livestock program.

- ✓ Natural protein and essential amino acids critical for lactation in breeders
- ✓ Developed from yeast, a highly digestible protein source for the rumen
- ✓ Source of valuable minerals and micronutrients

OrganicFlo is a certified allowable input for organic grazing operations. With 10% natural protein, it provides essential nutrition to maintain livestock condition. It is also an effective carrier of other nutrients for when a highly supported diet is required.

Notes

- (1) All comparisons and contents are calculated on a dry matter basis, unless otherwise stated. Dry matter is determined via the vacuum dry matter method at 600°C.
- (2) Nutrition figures are calculated from the nutrition values of their respective ingredients.
- (3) All values are typical values. The variability in the molasses composition from different sources may cause some variability in the nutrient composition of final products. Nutrition figures are calculated from the nutrition values of their respective ingredients.
- (4) ME is calculated via the FLIAC AUSMEAT accredited formula.
