#### Comments:

Wet weather hampered harvesting operations for much of the week, limiting weekly throughput to 7,644 tonnes.

CCS levels remained suppressed at 10.8 due to the wet conditions.

Field conditions are slowly improving and harvesting operations are due to commence on Tuesday 12 July.

Crushing will commence at Macknade Mill only at this stage, with Victoria Mill to come online when cane supply increases.

We have now processed just under 460,000 tonnes of cane in total to date.
