Comments:

Just under 115,000 tonnes of cane were crushed for the week.

Field conditions continue to impact harvesting and crushing operations, with slowly drying paddocks resulting in reduced throughput.

The weather stop enabled crews to conduct factory maintenance at both Herbert mills.

This means there is no requirement for a scheduled maintenance stop for the Herbert Mills this coming week.

CCS levels consistently remained around the 11.43 range for the week – slightly below budget.

Please remember to take care around our cane rail network and always give way to cane trains.
