Comments:

Higher than average rainfall persisted across the Herbert district for the week and continues to impact cane supply.

The Herbert mills operated with limited supply and crushed a total of 105,465 tonnes of cane with the majority processed at Victoria Mill.

Cleaning intermissions were brought forward to make the most of the forced downtime, resulting in no scheduled maintenance stops planned for this coming week.

Average CCS levels for the week remain below budget at 11.97 units.
