Comments:

The Herbert mills crushed a total of 192,647 tonnes of cane for the week.

Wet weather impacted crushing operations early in the week. The wet weather stop allowed for maintenance to be undertaken at both factories, therefore there are no scheduled maintenance stops for this coming week.

There was a slight decrease in CCS levels from the previous week, with the season-to-date average remaining below budget, at 12.08 units.

Growers are urged to compare the physical areas left to harvest with what is listed in their field book on grower Web.

Any variations should be reported to Wilmar sugar on 4776 4390.

Please remember to use your train brain and always give way to cane trains.
