Comments:

The Herbert mills crushed a total of 158,837 tonnes of cane for the week. A very reasonable effort after experiencing rainfall across the district ranging between 32mm and 98mm.

Average weekly CCS remains below budget at 12.07 units, with the season-to-date average at 12.1 units.

During the wet weather stops preventative maintenance was carried out at both mills.

The crop forecast continues to rise and is now estimated at 4.85M tonnes.

Growers once again are reminded to check their remaining unharvested blocks compared with those shown in their field book on the Grower Web site. Any variations should be reported to Wilmar Sugar on 4776 4390.

As always, please approach all cane railway crossings with caution and use your train brain.
