#### Comments:

About 188,200 tonnes of cane were processed for the week, pushing the season to date total past half-a-million tonnes.

CCS levels remain encouraging with the weekly average at 12.42 units.

Wet conditions at the end of the week allowed for scheduled maintenance to be brought forward while cane supply was limited.

A reminder that any work being undertaken near the cane rail network poses a safety risk.

Please communicate any planned work to the traffic office and ensure appropriate signage is used.
