#### Comments:

Just under 163,000 tonnes of cane were processed in the Herbert for the week.

Field conditions improved steadily during the week, with daily throughput increasing accordingly.

CCS levels were, once again, above budget, at 12.57 units.

A planned maintenance stop for Victoria's B-side scheduled for Tuesday 25 July has been deferred due to a forecasted rain event later this week.

Please take care around our cane rail network and always give way to cane trains.
