Comments:

Showers persisted across the district during the week, limiting available cane supply to just over 131,600 tonnes.

The average CCS was above budget at 12.72 units with the season-to-date average sitting at 12.46 units.

Both factories used the wet weather supply gaps during the week to undertake maintenance and cleaning intermissions.

No maintenance stops are scheduled for the coming week.

A reminder that cane trains are operating 24 hours a day and fully loaded locomotives take up to a kilometre to stop.

Please use your train brain and always give way to cane trains.
