| <b>District CCS</b> | <b>12.87</b> | <b>12.64</b>   |

#### Cane variety performance for region

| Variety | %    | CCS   | Variety | %   | CCS   |
|---------|------|-------|---------|-----|-------|
| Q208    | 25.2 | 13.43 | Q250    | 3.0 | 13.08 |
| Q253    | 23.5 | 12.59 | SRA14   | 2.7 | 11.66 |
| Q232    | 13.0 | 12.26 | Q231    | 2.0 | 12.59 |
| Q200    | 8.0  | 13.23 | SRA26   | 1.9 | 14.96 |
| Q240    | 7.9  | 12.58 | KQ228   | 1.7 | 12.43 |

#### Comments:

The Herbert mills processed 198,189 tonnes of cane for the week, which is the highest weekly throughput for the season to date.

Daily throughput at the factories has been encouraging due to continuing fine weather and drying field conditions.

Average weekly CCS was slightly up on the previous week at 12.87 units. This brings the season-to-date average to 12.64 units.

This week Victoria's B-side will undertake a 12-hour cleaning intermission on Tuesday 22 August.

Motorists are again reminded to approach cane railway crossings with caution.
