

Weekly production figures

Wilmar Sugar Herbert region mills Week 22, ending 18 November 2023

	This week	Season to date
Cane crushed		
Victoria	76,741	2,628,919
Macknade	65,332	1,210,279
Total	142,073	3,839,198
Average bin weight	6.24T	7.92T
Crop forecast	4.0M	

	This week	Season to date
District CCS	13.38	13.03

Cane variety performance for region

Variety	%	CCS	Variety	%	CCS
Q208	25.6	13.48	Q183	2.9	14.54
Q253	22.8	12.79	Q250	2.7	13.58
Q200	12.4	13.51	SRA14	2.3	13.42
Q232	11.5	12.32	KQ228	1.9	13.45
Q240	5.3	13.26	SRA5	1.8	11.21

Comments:

The Herbert mills processed just over 142,000 tonnes of cane for the week, bringing the season-to-date total to more than 3.8 million tonnes.

There was a slight increase in CCS levels of 0.19 of a unit from the previous week. The season-to-date average is 13.03 units.

Boiler tube issues restricted milling operations and throughput this week. As a result, the expected season end date will be extended beyond 22 November.

The revised date will be reviewed daily and communicated via GrowerWeb.

Although the production season is coming to an end, locomotive movements will continue over the next few weeks for cane bin maintenance.

Please continue to use your train brain and approach all cane crossings with caution.
