Comments:

Victoria Mill's 2024 production season commenced on Tuesday 2 July.

Herbert mills put through 80,000 tonnes of cane for the week. This was below budget due to the wet weather and associated cane supply gaps.

Wet ground conditions impacted harvesting operations.

A limited number of harvesting groups were able to operate, and some were on reduced quotas.

Cane trains are now operating around the clock, across our cane rail network. Please remember to use your train brain and always give way to cane trains.
