Comments:

Wet weather had a significant impact on harvesting and crushing operations.

Just over 50,000 tonnes of cane were processed for the week, which was well below budget.

The season to date total for the Herbert region is now 928,503 tonnes.

The average weekly CCS was 12.82, which was slightly below budget.

A one-hour industrial stoppage is planned for this Friday.

Please continue to use your train brain and always take care around our cane rail network.
