Comments:

Just under 180,000 tonnes of cane were crushed for the week, bringing the season-to-date total to 2.78M tonnes.

The average weekly CCS was 12.52 which is higher than last week's average of 12.28 CCS.

We have completed the re-estimating process. The Herbert crop has been adjusted down from 4.1M to 3.9M tonnes, giving an indicative end date between the 7th and 14th December, pending weather conditions.

Growers are reminded to submit a re-estimate request if they are not confident of the current projection for the farms.

Please continue to use your train brain and always take care around our cane rail network. Our cane trains are working 24 hours a day, seven days a week.
