Comments:

Recent rainfall had a significant impact on harvesting in some parts of the district. However, the Herbert factories remained online despite supply falling below the daily threshold.

The total weekly throughput was restricted to 82,807 tonnes of cane. This brought the season-to-date total to 3.74M tonnes, which represents 95 per cent of the total forecast crop.

The average weekly CCS was 10.09, which is down on last week's average of 11.58 and below the season-to-date average of 12.43 units.

More rain is forecast for the coming week. Harvesting groups are asked to contact the operations centre if there are any issues with cane supply.

With school holidays under way, parents and carers are asked to remind children about the dangers of playing around cane rail lines.

Please continue to use your train brain and always take care around our cane rail network. Our cane trains operate 24 hours a day, seven days a week.
