Comments:

More than 132,000 tonnes of cane were processed for the week, bringing the season-to-date total to 1.23M tonnes.

The average weekly CCS was 12.85, which is above the season-to-date average of 12.49 units.

Cane quality, purity and CCS levels remain pleasingly high, however the factory is receiving elevated levels of extraneous matter, which places milling infrastructure at risk of damage.

With factory maintenance days completed during the recent wet weather stops, we are not planning any cleaning intermissions for the next few weeks.

Please continue to use your train brain and always take care around our cane rail network. Our cane trains work around the clock, seven days a week.
