#### Comments:

Just under 188,000 tonnes of cane were processed for the week, bringing the season-to-date total to 1.42M tonnes.

The average weekly CCS was 13.03, which is almost half a unit above the season-to-date average of 12.56 units.

While overall cane quality, purity and CCS levels remain high, we ask that all flood or standover cane is identified on your tickets to reduce the risk of equipment damage at the factory.

Minor factory maintenance tasks are being completed during weekly operations. As a result, we are not planning any cleaning intermissions for the next week.

Thank you for continuing to work with us on the Long Pocket Bridge project. The team has scheduled upgrade works to ensure there are minimal interruptions to transport logistics and the harvesting sector.

Please continue to use your train brain and always take care around our cane rail network. Our cane trains work around the clock, seven days a week.
