#### Comments:

Just over 198,000 tonnes of cane were processed for the week, bringing the season-to-date total to 1.82M tonnes.

Average weekly CCS was pleasingly high at 12.98, which is above the season-to-date average of 12.67 units.

Another thank you to harvesting groups that are identifying flood or standover cane on tickets. We have seen a reduction in mill chokes/rate drops for the week.

Maintenance days were rescheduled last week to align with the current rain forecast. As a result, Macknade is scheduled for a maintenance day on Tuesday 9 September and Victoria Mill for Thursday 11 September.

Please continue to use your train brain and always take care around our cane rail network. Our cane trains work around the clock, seven days a week.
