Q232	8.7	12.66	SRA5	1.4	12.90
Q240	5.5	12.91	SRA14	1.3	12.69

Comments:

The Herbert mills processed more than 184,000 tonnes of cane for the week, bringing the season-to-date total to 3.13M tonnes.

The average weekly CCS was 13.22, which is above the season-to-date average of 12.82 units.

The Long Pocket Bridge upgrade works are complete for 2025, and we are well placed to execute stage two ahead of the 2026 production season.

We are mindful of the challenges facing the harvesting sector with manning, area cover and logistics, and will continue to work with harvesting groups to achieve a safe conclusion to the production season.

Based on the latest estimate and no significant interruptions, we expect to finish the season in the week ending 22 November. We will continue to communicate any changes.

Please remember to stay cane train aware, particularly when approaching crossings.

Our cane trains work around the clock, seven days a week.
