Q240	8.2	12.77	Q183	1.9	12.98
Q232	7.4	12.97	SRA6	1.8	11.69

Comments:

The Herbert mills processed just over 191,000 tonnes of cane for the week, bringing the season-to-date total to 3.5M tonnes.

The average weekly CCS was 12.96, which is above the season-to-date average of 12.83 units.

There was minimal rainfall last week despite the forecast. Further rain forecast for later this week or early next week

We have updated our end of season notice to our employees, advising the week ending 29 November 2025 for the cessation of harvesting.

We are asking for patience while we manage the final weeks of the season with the current weather and mechanical challenges. We're committed to processing all cane in the region and safely wrapping up the 2025 season.

Please remember to stay cane train aware, particularly when approaching crossings. Our cane trains work around the clock, seven days a week.
