#### Comments:

The Herbert mills processed just over 176,600 tonnes of cane for the week, bringing the season-to-date total to 3.68M tonnes.

The average weekly CCS was 12.79, which is below the season-to-date average of 12.83 units.

There was minimal rainfall last week despite the forecast. The expectation is for clear weather next week.

We have sent out our cessation of crushing notice nominating 26 November 2025 as the expected last day of harvesting. This date is based on the latest adjusted estimate, manual remains, forecast factory throughputs and no further rain disruptions.

We are asking for patience while we manage the final days of the season. We are committed to processing all cane in the region and safely wrapping up the 2025 season.

Please remember to stay cane train aware, particularly when approaching crossings. Our cane trains work around the clock, seven days a week
