Comments:

Wet weather hampered harvesting operations in the first part of the week, limiting weekly throughput to 168,792 tonnes.

Field conditions improved in the latter half of the week and harvesting is now under way across the whole Herbert region, with only some limitations due to wet ground conditions.

CCS levels showed a slight improvement throughout the week, assisted by a series of cold nights and cool, fine days and closed the week out at 11.55 units.

We've now crushed more than half a million tonnes of cane in total.
