Comments:

Total weekly throughput was limited to 145,753 tonnes of cane.

The reduced throughput was due to wet weather in the latter part of the week impacting harvesting operations.

There was also a scheduled maintenance stop for Victoria's B side on Wednesday.

There was a modest 0.23 of a unit improvement in CCS levels over the previous week.

With the commencement of school holidays, parents and carers are asked to remind children of the dangers associated with cane trains.

Children should stay well away from the tracks, points, locos and cane bins.
