

RENEWABLE ENERGY

It's what we do

While others talk about renewable energy, *we do it.*
We've been using bagasse to power our sugar mills
and our communities for years.

We're one of
**AUSTRALIA'S
LARGEST**
producers of renewable
energy from biomass

We generate electricity
from bagasse 24/7, for nine
months of the year. It's
CLEAN ENERGY
and it's **RELIABLE**

We've been powering
Queensland homes
on green energy for
60 YEARS

OUR MILLS
have a total
generation capacity
of **202 MW**

We produce about
559,000 MWh
of renewable
electricity a year*

Each year, we export
295,000 MWh to
the grid - enough to power
about **52,000 HOMES**
for a year*

Bagasse fuels 16% of Australia's renewable energy **
