

FACTORY steam TRIALS

PROSERPINE MILL

2022 pre-season steam trials

Steam trials

In readiness for the start of the 2022 crushing season, pre-season factory steam trials are scheduled at Proserpine Mill on:

Tuesday 7 June 2022

Short bursts of steam noise will be produced during these trials. We are legally required to perform safety trials on our factory steam plant prior to commencing regular crushing operations. Steam trials also enable us to commission the new items of plant installed during the 2022 maintenance season.

The second set of steam trials is planned for:

Tuesday 14 June 2022

Efforts will be made to minimise noise during this time.

These dates will be reviewed regularly and we will advise of any changes.

Crush start

Proserpine Mill is expected to start crushing on:

Tuesday 21 June 2022

Kind regards

Damien Kelly
Production Superintendent
Proserpine Mill
