

PLANE CREEK MILL

2022 pre-season steam trials

May 2022

Steam trials

In readiness for the start of the 2022 crushing season, pre-season factory steam trials are scheduled at Plane Creek Mill on:

Wednesday, 1 June 2022

Short bursts of steam noise will be produced during these trials.

We are legally required to perform safety trials on our factory steam plant prior to commencing regular crushing operations. Steam trials also enable us to commission the new items of plant installed during the 2022 maintenance season.

The second set of steam trials is planned for:

Wednesday, 8 June 2022

Efforts will be made to minimise noise during this time.

Crush start

Crushing is expected to start at Plane Creek Mill on:

Tuesday, 14 June 2022

Kind regards

Sam Pocock
Production Superintendent
Plane Creek Mill
