

MACKNADE MILL

2022 pre-season steam trials

May 2022

Steam trials

In readiness for the start of the 2022 crushing season, pre-season factory steam trials are scheduled at Macknade Mill from:

Tuesday, 31 May to Monday, 6 June 2022

Short bursts of steam noise will be produced during these trials. We are legally required to perform safety trials on our factory steam plant prior to commencing regular crushing operations. Steam trials also enable us to commission the new items of plant installed during the 2022 maintenance season. Efforts will be made to minimise noise during this time.

Crush start

Macknade Mill is expected to start crushing on:

Tuesday 14 June 2022

Kind regards

Harrison Slogrove
Production Superintendent
Macknade Mill
