Comments:

Throughput for week 18 was just shy of 380,000 tonnes of cane in a week that included a cleaning intermission at Inkerman Mill and unscheduled stops at Pioneer and Kalamia mills.

Average weekly CCS was 15.67, which is 0.61 of a unit above budget.

The highest CCS recorded for the week was 18.00 from a rake of Q183 fourth ratoon supplied from the Inkerman productivity district.

We are nearing the end of the Burdekin season. Based on the expected final crop and no major disruptions, we expect the first of our Burdekin mills – Kalamia and Inkerman – to crush out late next week. Pioneer and Invicta mills are expected to finish in the third week of October.

A reminder to growers, harvesting contractors and the travelling public to remain vigilant around our cane rail network as we work through the final weeks of the Burdekin season.

Parents and carers are urged to remind children to stay away from the cane railway network. Members of the public are urged to report any suspicious activity around our cane rail line to the police.
