Comments:

The Herbert mills processed just under 190,000 tonnes of cane for the week, bringing the season-to-date total to 2.54M tonnes.

The average weekly CCS has again tracked above budget at 14.51 units, lifting the season-to-date CCS to 13.69.

Victoria Mill had a cleaning intermission on Tuesday, while Macknade Mill crews completed minor maintenance jobs throughout the week to avoid a maintenance stop.

Please be mindful that our operations team are assisting groups with daily quota, equity management and migration requests. We expect the cane supply for the remainder of the season to be predominantly from the western line and see continued pressure to service multiple groups on branch lines.

We ask the public to remain vigilant around our cane rail network and to please report any unsafe behaviour to the police.

Remember, cane trains can't swerve or stop quickly. Please approach all crossings with caution, obey all signs and signals, and always give way to cane trains.
