Comments:

The Herbert mills processed about 175,500 tonnes of cane for the week, pushing the season-to-date total to 3.54M tonnes.

Weekly CCS increased slightly from the previous week to average 12.97 units. This is above budget and brings the season-to-date CCS to 13.71.

Rain interrupted milling operations during the week, with the southern line receiving more than 200mm of rain over the weekend. Victoria and Macknade mills continue to operate with the end of season fast approaching.

We appreciate the feedback from harvesting groups on manual remains. This is assisting us with managing cane supply and the Herbert mills' step-down strategy from full milling operations to single milling train as we finalise the 2026 season.

Again, I'd like to remind locals and visitors to remain vigilant around our cane rail network and report any unsafe behaviour to the police.

Remember, cane trains can't swerve and they can't stop quickly. Please approach all crossings with caution, obey all signs and signals, and always give way to cane trains.
