

Weekly Production Figures

Wilmar Sugar and Renewables Proserpine Mill Week 18 ending 10th October 2026

	This week	Season to date
Cane crushed	79,790	1,296,412
Average bin weight	9.26	9.33
CCS	15.15	14.41

Cane variety performance for region

Variety	%	CCS	Variety	%	CCS
Q240	23.0	14.86	Q253	5.3	15.08
Q208	18.6	15.41	SP80	3.4	15.56
Q183	16.5	15.46	SRA21	2.4	12.90
SRA9	13.9	15.57	Q232	1.8	13.57

Comments

Proserpine Mill processed close to 80,000 tonnes of cane for the week, bringing the season-to-date total to more than 1.29M tonnes.

Average weekly CCS came in above budget, at 15.15 units.

The highest weekly CCS sample for the week was 17.97 units, from a rake of SRA 26 ratoon cane in the Lethebrook productivity district.

Based on an expected final crush of 1.44 million tonnes, forecast factory throughputs and no rain disruptions, harvesting in the Proserpine Mill area is currently expected to finish on or around Wednesday 21 October 2026.

Growers are asked to check that the estimate of cane remaining on each of their blocks is current, and to communicate any changes to their logistics officer.

As we approach the end of the season, I'd like to remind locals and visitors to remain vigilant around our cane rail network.

Remember that a fully loaded cane train can take up to one kilometre to pull up.

Our cane trains work around the clock, seven days a week, so please continue to use your train brain and always give way to cane trains.
