Q183	16.3	15.37	Q232	5.7	14.85
Q240	14.3	15.50	KQ228	1.9	14.56
SRA9	12.8	14.65	SRA12	1.8	15.39

Comments

Proserpine Mill processed close to 84,600 tonnes of cane for the week, bringing the season-to-date total to more than 1.38M tonnes.

Average weekly CCS came in above budget, at 14.93 units.

The highest weekly CCS sample for the week was 18.15 units, from a rake of SRA 26 Plant cane in the Lethebrook productivity district.

The recent rain event has pushed out the expected season finish date by a day. With no further rain disruptions, the last day of harvesting will be Thursday 22 October.

Growers are asked to check that the estimate of cane remaining on each of their blocks is current, and to communicate any changes to their logistics officer.

As we approach the end of the season, I'd like to remind locals and visitors to remain vigilant around our cane rail network.

Our cane trains work around the clock, seven days a week, so please continue to use your train brain and always give way to cane trains.
