Comments:

Just under 62,000 tonnes of cane were crushed for the week, bringing the season total to more than 315,600 tonnes.

This was a reasonable weekly throughput, given there was a 12-hour planned maintenance stop and a delayed re-start to enable crews to replace a failed liquor pump motor.

Average CCS increased by 0.32 of a unit over the previous week, pushing the season-to-date CCS figure above 12 for the first time this year.

The highest CCS recorded for the week was 15.00 from a rake of Q240 5R from the Koumala productivity district.

As always, locals and visitors are reminded to take care around our cane rail network.

Please approach all level crossings with caution and always give way to cane trains.
