Comments:

Just over 25,000 tonnes of cane was crushed for the week, bringing the season total to nearly 131,000 tonnes.

Factory processing and mechanical issues earlier in the week resulted in a number of lengthy unscheduled stops.

Widespread rain on Tuesday brought harvesting operations to a halt until Friday. Production resumed at Plane Creek Mill late on Friday.

Average CCS improved by 0.34 of a unit over the previous week. A reduction in the percentage of stand-over cane delivered contributed to an improvement in the overall CCS result.

The highest CCS for the week was 16.4, from a rake of Q183 second ratoon from the Mt Christian productivity district.
