#### Comments:

Just under 45,000 tonnes of cane was processed for the week, bringing the season total to 175,289 tonnes.

One of the two turbines driving the shredder failed on Monday morning. The factory's crush rate was impacted until Thursday morning, when the turbine was repaired and recoupled.

Vacuum pan issues contributed to a number of unscheduled stops throughout the week.

Average CCS jumped by nearly one unit over the previous week, and closed out at 13.62. Standover cane made up 12 per cent of the week's cane supply.

The highest CCS for the week was 15.80, from a rake of Q240 second ratoon from the Mt Christian productivity district.
